

Civil Work

Project: Crude Tanks Spill Containment

Client: BP Refinery Kwinana

Contract Value: POA

Completion: Completed in September 2000

Details:

Supply and install concrete spill containment slab and storage sumps for 6 off crude tanks on site at BP Refinery Kwinana.

Scope included

- Concrete slabs and sumps (1,000m³).
- All sumps precast at ground level as productivity improvement over installing in position under confined space entry restrictions and craned into position (20t).
- Shored and dewatered excavations.
- HDPE lining.
- Various concrete pump foundations and slabs.
